PROJECT EXPERIENCE

January 2023

Database project- Summer camp registration reviewing system

- Import data from Google and automatically replying after receiving remittance
- Account managing, permitted people can review the relate information
- Supporting fuzzy search and exporting chart

August 2023 ~
June 2024

Under graduate study: Adaptive EEG alpha power classification model

- Preprocess the digital signal of electroencephalography
- Dynamic adjust the alpha threshold with 30s pre-acquisition signal
- Mining data to find characteristics in different people to solve variety in EEG

March 2025 ~
June 2025

Genetic Algorithm project- IGA based Spotify music recommend system

- BLX-alpha crossover to avoid recommending converse
- Fuzzy-similarity to measure the feature distance between music
- Interact with user the score the recommendation of each iteration

July 2025 ~
Now

Academia Sinica Research assistant: Raw events anomaly detection

- Process raw events according to the attribute of the field
- Feature extraction across events and within events
- Unsupervised learning method to detect anomaly events in log files
- Automatically generate the labes for lateral study and analysis

EDUCATION

National Taiwan
University
2026 - Now

Master of Science in Information Security

- Advisor: Ming-Syan Chen, PhD
- Studying in SLM domain including domain fine-tuning, acceleration and edge employment

National Yang Ming
Chiao Tung University
2021 - 2026

Bachelor of Science in CS major

- Undergraduate study in Cognitive Engineering and Computational Neuroscience Lab guided by professor Chun-Shu Wei, PhD
- AI and Data Science program complete
- Network Engineering program complete
- Computer Security program complete

SKILLS

C++
Python
SQL
React
Data Visualization (d3.js)

LANGUAGE

English
Chinese
Japanese(self-learning)

INTEREST

Bartending
Coffee hand dripping
Writing
Education
